FOR IMMEDIATE RELEASE

GCI REPORTS PRELIMINARY SECOND QUARTER 2008 FINANCIAL RESULTS

- Consolidated revenue of \$142.5 million
- EBITDAS of \$43.4 million
- Net income of \$3.6 million or \$0.07 per diluted share

ANCHORAGE, AK -- GCI (NASDAQ:GNCMA) today reported preliminary second quarter 2008 revenues of \$142.5 million, an increase of 9.7 percent over the second quarter of 2007. Second quarter 2008 earnings before interest, taxes, depreciation, amortization and share based compensation expense (EBITDAS) totaled \$43.4 million. EBITDAS increased \$1.8 million or 4.2 percent from the second quarter of 2007. The increase in EBITDAS was attributable to growth in all segments except network access.

GCI's second quarter 2008 net income is expected to be \$3.6 million, or earnings per diluted share of \$0.07. The company's second quarter net income compares to net income of \$5.9 million, or earnings per diluted share of \$0.11 in the same period of 2007.

Second quarter 2008 revenue increased along all products lines when compared to the prior year. Second quarter results include the acquisition of the United companies as of June 1, 2008.

Revenues for the company increased \$7.8 million, or 5.8 percent, over first quarter 2008 revenues of \$134.7 million. Second quarter EBITDAS of \$43.4 million increased 13.6 percent from \$38.2 million in the first quarter of 2008.

"We just concluded another excellent quarter," said GCI president Ron Duncan. "GCI's second quarter results set new records for both revenue and EBITDAS. Our strong financial results are being driven by solid and growing customer metrics across all categories. We are on target to achieve our goals for 2008 and 2009."

"GCI achieved a number of important milestones since the end of the first quarter. We closed our acquisition of the United companies. We successfully transitioned all our rural telecommunications traffic to the Galaxy 18 satellite. Shortly after the end of the quarter we closed our acquisition of Alaska Wireless, LLC. This acquisition jump starts GCI's rural wireless initiative and along with our own rural wireless build-out will allow GCI to provide wireless service in more than 40 rural communities before the end of the year and more than 200 rural communities within the next 24 months. The build-out plans for our urban wireless networks are proceeding and we hope to close our acquisition of the remaining interest in Alaska DigiTel prior to the end of the third quarter."

"The third quarter marks the start of our wireless transition. Significant amounts of EBITDAS will be shifted from our network access business to our consumer and commercial business units as a result of the transition of AT&T Mobility traffic off of our carrier network and our transition of wireless customers from the AT&T network to our own," said Duncan. This process will add significantly to EBITDAS when it is complete by this time next year. I anticipate continued improvement in customer counts and operating

metrics during the third quarter. Financial results should be similar to the just completed quarter. Third quarter EBITDAS may be burdened some by the costs and pace of the wireless transition. I am confident, however, that we will hit our announced goals for both 2008 and 2009.”

GCI reaffirms 2008 guidance for revenues of \$550 million to \$560 million and EBITDAS of more than \$165 million. Additionally GCI anticipates total cash receipts in excess of \$45 million during 2008 as a result of fiber IRU agreements which are not otherwise reflected in current guidance. Second quarter 2008 results exceeded guidance for revenues of \$133 million to \$136 million and for EBITDAS in excess of the first quarter. Third quarter revenues are expected to total \$138 million to \$141 million, not including revenues from the amortization of fiber sales.

Highlights

- Consumer revenues totaled \$62.1 million, an increase of 12.7 percent over the prior year quarter and an increase of 1.2 percent over the first quarter of 2008. The increases were across all products and services.
- GCI local access lines increased by 14,800 over the first quarter of 2008. The increase includes access lines from the acquisition of the United companies. Consumer, network access, commercial and other local access lines totaled 137,700 at the end of the second quarter of 2008, representing an estimated 32 percent share of the total access line market in Alaska. GCI began providing local access services on its own facilities in the Nome market during the second quarter of 2008.
- GCI has provisioned 89,700 access lines on its own facilities at the end of the second quarter of 2008, an increase of 18,600 lines over the first quarter of 2008 and an increase of 35,000 lines when compared to the end of the second quarter of the prior year. The increase in provisioned lines includes 12,200 lines acquired from the United companies. The company had provisioned 54,700 access lines on its own facilities at the end of the second quarter of 2007. Plant upgrades were completed in the Fairbanks, Seward and Homer markets during the second quarter.
- GCI had 100,000 consumer and commercial cable modem access customers at the end of the second quarter of 2008, an increase of 300 over the 99,700 cable modem customers at the end of the first quarter 2008. Average monthly revenue per cable modem totaled \$37.77 for the second quarter of 2008 as compared to \$36.71 for the first quarter of 2008, an increase of 2.9 percent. The increase in average monthly revenues arises primarily from customers upgrading to plans with increased levels of service.
- GCI has 84,100 wireless subscribers, an increase of 3,900 subscribers from the first quarter of 2008.
- GCI’s contractors began laying 750 miles of undersea fiber that will connect 50,000 residents in several communities in Southeast Alaska. The \$33 million project is expected to be completed before the end of 2008.
- GCI is on track with its redundant fiber route to Fairbanks and with its diverse fiber route along Turnagain Arm near Anchorage. The Turnagain Arm project eliminates a current bottleneck where all of the fiber routes out of Alaska come unacceptably close together and when completed will allow GCI’s lower 48 fiber ring to fully meet the diversity requirements of the United States Department of Defense.

Consumer

Consumer revenues increased 12.7 percent to \$62.1 million compared to \$55.1 million in the second quarter of 2007 and increased 1.2 percent over the first quarter of 2008. The increased revenue is from all consumer product offerings.

Consumer voice revenues were up 4.4 percent over the prior year and 2.3 percent over the first quarter of 2008. Consumer local access lines in service for the second quarter were up approximately 9,700 lines compared to the second quarter of 2007. Access lines in the second quarter increased by 1,300 over the first quarter of 2008. Voice revenues continue to increase due to sales of voice services in existing and newly opened markets.

GCI serves 60,500 consumer access lines on its own facilities, an increase of 5,000 lines from the first quarter of 2008

Consumer video revenues increased 7.4 percent over the prior year and were up slightly from the first quarter of 2008. The increase in year-over-year revenue is due in part to an increase in video subscribers purchasing higher tier services including high definition or digital service and renting high definition/digital video recorders. Consumer video subscribers totaled 130,300, an increase of 5,600 subscribers over the second quarter of 2007 and a seasonal decrease of 400 subscribers from the first quarter of 2008.

Consumer data revenues increased 25.6 percent over the prior year and 2.9 percent over the first quarter of 2008. The increase in consumer data revenues is due to an increase in cable modem customers and an increase in average monthly revenue per modem subscriber. The increase in average monthly revenues arises in part from customers upgrading to plans with increased levels of service. GCI added 8,400 consumer cable modem customers over the prior year and 100 customers during the second quarter of 2008.

Consumer wireless revenues increased to \$13.9 million, an increase of 22.9 percent over the second quarter of 2007. The increase in wireless revenues is primarily due to an increase in wireless subscribers, including those of the company's wireless subsidiary, Alaska DigiTel.

Network Access

Network access revenues increased 0.7 percent to \$41.9 million as compared to \$41.6 million in the second quarter of 2007 and increased 6.9 percent over the first quarter of 2008.

Voice revenues, as expected, decreased 5.5 percent from the prior year and increased 5.8 percent over the first quarter of 2008. The decrease in voice revenues from the prior year is primarily due to the effects of rate reductions for other common carriers. Network access minutes increased 2.7 percent to 326.2 million minutes for the second quarter of 2008 as compared to the second quarter of 2007. Minutes for the second quarter of 2008 increased 3.7 percent from the first quarter of 2008.

Data revenues for the second quarter of 2008 were up 16.3 percent compared to second quarter 2007 and increased 6.8 percent over the first quarter of 2008. The increase in data revenues over the prior year is primarily due to an increase in circuits sold.

Commercial

Commercial revenues increased 4.8 percent to \$27.4 million as compared to \$26.2 million in the second quarter of 2007 and increased 3.2 percent from \$26.6 million in the first quarter of 2008. Commercial revenues increased from the prior year primarily due to an increase in time and materials revenues. Revenues increased along all commercial

product lines over the first quarter of 2008.

A second quarter decrease in voice revenues as compared to the prior year was primarily due to a decrease in average revenue per minute and a 3.5 percent decrease in long distance minutes. Sequentially, commercial minutes increased 0.3 percent over the first quarter of 2008. GCI increased commercial local access lines by 2,500 over the second quarter of 2007 and 1,900 when compared to the first quarter of 2008.

Commercial video revenues increased 7.2 percent on a year-over-year basis and increased 18.1 percent sequentially over the first quarter of 2008. The increase in video revenues year-over-year is due primarily to a 15.4 percent increase in subscribers. The sequential increase in revenues is due mostly to an increase in advertising revenues.

Commercial data network revenues in the second quarter of 2008 totaled \$16.6 million, an increase of 13.9 percent when compared to \$14.6 million in the second quarter of 2007 and \$0.4 million or 2.3 percent, when compared to \$16.2 million in the first quarter of 2008.

Commercial data network revenues comprise \$9.5 million in monthly recurring charges for data services and \$7.1 million in charges billed on a time and materials basis largely for personnel providing on site customer support. This latter category can vary significantly based on project activity. For the second quarter of 2008 monthly recurring data revenues increased by approximately \$0.9 million when compared to the second quarter 2007 and \$0.3 million compared to the first quarter 2008. Time and material charges increased by \$1.1 million as compared to the second quarter of 2007 and increased by \$0.1 million as compared to the first quarter of 2008.

Managed Broadband

Managed broadband revenues totaled \$9.1 million in the second quarter of 2008, an increase of 31.4 percent from \$7.0 million in the second quarter of 2007. Revenue for the second quarter was up 21.4 percent from the \$7.5 million reported in the first quarter of 2008. The large increases in revenues were due primarily to one time equipment sales.

Regulated Operations

GCI acquired United Utilities, Inc. (UUI) and its wholly owned subsidiary United-KUC, Inc., as part of its acquisition of the United companies on June 1, 2008. UUI and United-KUC are incumbent local exchange carriers that obtain their revenues from rates derived from the regulated revenue requirement for each service they provide.

UUI's consolidated regulated revenues for one month of the second quarter totaled \$1.9 million and its EBTIDAS totaled \$0.4 million. UUI consolidated has 12,200 local access lines at the end of the second quarter of 2008.

Other Items

During the second quarter of 2008 GCI's capital expenditures totaled \$167.4 million as compared to \$52.7 million in the first quarter of 2008. GCI's capital expenditures include those of Alaska DigiTel and include capital lease assets totaling \$98.6 million attributable to the Galaxy 18 Satellite.

While the company believes that the financial results included in this press release are materially correct, the company's auditors have not yet concluded all aspects of their review of our financial statements. Accordingly, the financial results included herein should be considered preliminary and may be subject to change following conclusion of the review.

GCI will hold a conference call to discuss the quarter's results on Thursday, July 31, 2008 beginning at 2 p.m. (Eastern). To access the briefing on July 31, dial 888-791-

1856 (International callers should dial 210-234-0001) and identify your call as "GCI." In addition to the conference call, GCI will make available net conferencing. To access the call via net conference, log on to www.gci.com and follow the instructions. A replay of the call will be available for 72-hours by dialing 866-413-9161, access code 7461 (International callers should dial 203-369-0666.)

GCI is the largest telecommunications company in Alaska. The company's cable plant, which provides voice, video, and broadband data services, passes 90 percent of Alaska households. GCI operates Alaska's most extensive terrestrial/subsea fiber optic network, which by the end of 2008, will connect not only Anchorage but also Fairbanks, and Juneau/Southeast to the lower 48 states with a diversely routed, protected fiber network. The company's satellite network provides communications services to small towns and villages throughout rural Alaska. GCI is now in the process of constructing Alaska's first truly statewide mobile wireless network, which will seamlessly link urban and rural Alaska for the first time in the state's history.

A pioneer in bundled services, GCI is the top provider of voice, data, and video services to Alaska consumers with a 70 percent share of the consumer broadband market. GCI is also the leading provider of communications services to enterprise customers, particularly large enterprise customers with complex data networking needs. More information about the company can be found at www.gci.com.

The foregoing contains forward-looking statements regarding the company's expected results that are based on management's expectations as well as on a number of assumptions concerning future events. Actual results may differ materially from those projected in the forward looking statements due to uncertainties and other factors, many of which are outside GCI's control. Additional information concerning factors that could cause actual results to differ materially from those in the forward looking statements is contained in GCI's cautionary statement sections of Form 10-K and 10-Q filed with the Securities and Exchange Commission.

Depreciation and Amortization Expense. EBITDA is not presented as an alternative measure of net income, operating income or cash flow from operations, as determined in accordance with accounting principles generally accepted in the United States of America. GCI's management uses EBITDA to evaluate the operating performance of its business, and as a measure of performance for incentive compensation purposes. GCI believes EBITDA is a measure used as an analytical indicator of income generated to service debt and fund capital expenditures. In addition, multiples of current or projected EBITDA are used to estimate current or prospective enterprise value. EBITDA does not give effect to cash used for debt service requirements, and thus does not reflect funds available for investment or other discretionary uses. EBITDA as presented herein may not be comparable to similarly titled measures reported by other companies.
