

# GCI Managed Firewall

Take a very big job off of your plate – protecting your systems, data, and people. Get none of the pressure and all of the performance with fully supported services.

## PROTECT YOUR SYSTEMS FROM THE LATEST THREATS

It's no longer enough to leave your security on auto-pilot. In the face of constantly evolving attacks and the rising risk of data breaches, we offer a fully managed solution that increases security for your systems, data, and people.

### **UP-TO-DATE PROTECTION**

We provide automatic updates and upgrades to the firewall service for effective protection against new threats.

### **MULTI-LAYERED SECURITY**

Our managed firewall service allows you to add application-level security and intrusion detection and prevention service for multi-layered security.

### **24/7/365 SUPPORT AND MONITORING**

We proactively monitor and manage the firewall service with around-the-clock dedicated support.

Your Business Technology Partner®

# **GCI** Managed Firewall

## **STREAMLINE FIREWALL MANAGEMENT AND MONITORING**

GCI's Managed Firewall provides network security and content filtering based on a thorough assessment, which establishes specific requirements for design, configuration, and deployment. Once your solution is in place, GCI will proactively monitor and manage it for a predictable monthly cost.

### **HERE'S WHAT'S INCLUDED:**

- Network antivirus and anti-malware protection
- Content filtering services customized with rules based on content categories, applications, protocols, and IP addresses
- Access controls configured to your requirements
- Application-based security
- Network virus and spyware protection
- URL filtering
- Identification of bot-infected hosts
- Reports and tools for management and analysis
- Intrusion detection service
- 24/7/365 monitoring

*Currently available in select service locations. Contact GCI for availability in your area.*
