

GCI Managed WiFi

**FULLY-MANAGED WIFI DESIGN,
DEPLOYMENT, SECURITY, AND SUPPORT —
HIGH PERFORMANCE WITH LOW OVERHEAD**

GCI's Managed WiFi offers a complete solution at a predictable monthly cost, saving your organization the capital expense of purchasing network equipment and the operational expense of maintenance and support.

CURRENT TECHNOLOGY, COMPREHENSIVE COVERAGE

With Managed WiFi, design begins with an assessment of your site and a deployment plan based on your needs. Particular consideration is given for high-density environments where multiple devices and WiFi networks share the same area.

Once you approve the design, GCI will:

- Install cabling or upgrade existing cabling when needed
- Deploy new WiFi equipment and management software
- Proactively monitor and manage the WiFi network
- Establish and maintain WiFi network security
- Ensure performance and availability with regular updates
- Provide 24/7/365 technical support

GCI Managed WiFi

PLATFORMS AND EQUIPMENT

GCI has designed, built, and managed WiFi networks for businesses across different industries and organizations of different sizes, many in some of North America's most challenging environments. Our deployments feature:

- Aerohive Networks
 - Access Points
 - Switches
 - Management Software
- Cabling Between Switches and Access Points

MANAGE EVEN MORE WITH GCI

If your business has further network or overall IT needs, GCI offers additional services to help you manage your technology better, and more cost-effectively:

- Managed IT offers support, security, and management for your workstations, laptops, servers, and other devices on your network.
- Network Services provides enterprise-grade network management and 24/7/365 on-call support based on your scope and for a fixed, monthly cost.

Currently available in select service locations. Contact GCI for availability in your area.
