

Direct Advantage Plan

No longer available for Business new enrollment effective 8/01/2011

New and existing Business Customers who meet the eligibility requirements described herein, may elect to enroll in this Plan in lieu of the Dial Station Basic Rates in Section 3.1.4, and Calling Card Basic Rates in Sections 3.1.14 and 3.1.15.

1. ELIGIBILITY

- a. Customer must have all its access lines pre-subscribed under this Plan for interstate service, and under the intrastate Direct Advantage Plan for intrastate service.
- b. Customer must be subscribed to Company-provided Local Wireline service, or sign a Term of Service Commitment of at least one year for intrastate service on all its access lines.

2. RESTRICTIONS

- a. If a Customer changes any of its access lines to another interexchange carrier, such access lines may be subject to an early termination penalty calculated by the difference between the rates paid under this Plan, and the rates corresponding to the selected term, and the rates for the term actually completed. In such case, Customer would cease meeting the requirements of this Plan, and would become ineligible to receive future benefits under this Plan.

3. RATES

Unless otherwise specified, only one calling plan is allowed per main billed account. This Plan only includes rates for Dial Station, Calling Card, and 800/888/877 services (i.e., excludes operator service and directory assistance).

This Plan has a minimum monthly usage requirement of \$250 for combined interstate and intrastate usage charges. If monthly usage is below \$250, Customer shall be invoiced the difference between the actual monthly usage and the \$250 minimum requirement.

Customers are responsible for the installation cost, and monthly charges, of any T-1 connection to the nearest GCI switching facility, however, Customers who obtain Company-provided local access, and use such local access connection for services under this Plan, will not incur monthly recurring charges in addition to the monthly recurring charges already being paid by the Customer for such local access service.

3. RATES (Cont.)

- a. "Part-net" calls consist of calls that originate (or, in the case of 800/888/877, terminate) at a Business Customer's location, are carried on a T-1 connection directly to the nearest Company switching facility, and are transported to another Business Customer Location which is connected to the Company via a LEC switching facility.

The following rates apply to Part-net calls (a \$.25 surcharge applies to all Calling Card calls):
