

Frame Relay Specialized Customer Arrangements (SCA)

A. General

- (i) The service or services to be provided under an SCA consist of one or more of the services offered, or to be offered, pursuant to the applicable sections of this Tariff.
- (ii) The Company may offer an SCA or, at its sole option, amend an existing SCA specifically to respond to an offer or another carrier, when a customer or prospective customer demonstrates to GCI's satisfaction that, without GCI's offer, it will subscribe to another carrier's offer.
- (iii) Customers who have unique provisioning or availability requirements will be considered on an individual case basis.
- (iv) The following terms and conditions apply to all SCAs:
 - 1. Except as otherwise provided in this section, applicable terms, conditions, rates, and other regulations set forth in this Tariff and in other applicable tariffs shall apply to service included in SCAs.
 - 2. A customer who terminates an SCA before the expiration of the term to which the customer is committed, or, who fails to satisfy the applicable minimum volume commitments during any measurement period, will be required to pay termination or under-utilization charges, as mutually agreed between the Company and the customer. Any applicable discounts will not apply or will otherwise be adjusted. Minimum volume and term commitments may also be subject to adjustment based on changing conditions, including the failure of the Company or customer to satisfy a material condition of the SCA.
 - 3. If the Company amends other sections of this tariff, affecting the applicable discount for SCA services, and such services are aggregated with other services for purposes of calculating discounts, the customer may elect to receive the benefit of such discount, or continue to receive the discount set forth in the SCA, but shall not be entitled to receive the benefit of both discounts. Unless otherwise provided for in the SCA, the discounts provided for in the SCA are in lieu of, and not in addition to, any discounts or payments to which the Customer is, or would otherwise be entitled to receive by application of tariff discounts.

B. Optional SCAs

- (i) Option Number: FR001
Contract Term: 48 Months
Terms: Standard Frame Relay Terms and Conditions

B. Optional SCAs (cont'd)

(i) Option Number: FR001 (cont'd)

The customer will access the frame relay network by via dedicated local access loops at the prevailing Interstate access rates for 56/64 kbps and T-1. In addition Customer has contracted for 768kbps Ethernet loops, to a minimum of 10 location in the Company's local wireline service area at an MRC of \$109.00 per location, and one 10mb loop in conjunction with this network at an MRS of \$1,105.00.

There are no non-recurring charges NRC in association with this SCA.

Additional Benefits

If customer total annual charges for Interstate MTS and data communications service exceed \$300,000 as measured by invoices from January – December, the Customer will be eligible for a credit equal to 5% of those services.

B. Optional SCAs (cont'd)

(i) Option Number: FR001 (cont'd)

Additional Benefits (cont'd)

If customer total annual charges for Interstate MTS and data communications service exceed \$350,000 as measured by invoices from January – December, the Customer will be eligible for a credit equal to 7% of those services.

If customer total annual charges for Interstate MTS and data communications service exceed \$400,000 as measured by invoices from January – December, the Customer will be eligible for a credit equal to 10% of those services.

(i) Option Number: FR002

Contract Term: 60 Months

Terms: Standard Frame Relay Terms and Conditions
