

MESSAGE TOLL SERVICES RATE SCHEDULES

RATE CALCULATIONS

A. Call Duration - For rating purposes, if the actual total duration of a call includes a fraction of a minute, the call duration is rounded up to the next whole minute, except where otherwise specified.

B. Applicable Rate Periods - The rate applicable is that rate which is in effect at the calling station when the minute begins. That is, if chargeable time begins during the Evening Rate Period, the Evening rate applies to any minutes occurring during that period. If the call continues into the Night Rate Period, Night rates apply to any additional minutes occurring during that period.

C. Total Charges - If the computed charges include a fraction of a cent, the fraction is rounded up or down to the nearest cent. On a split period call, each period is rounded separately and then added together.
